

Integrated care is at the core of our programs. Hence, we have come up with various ways to help our clients get the most out of our delivered care. Our support services offer a collaborative way for clients to improve their functions, manage their symptoms, and find opportunities in their careers and within the community.

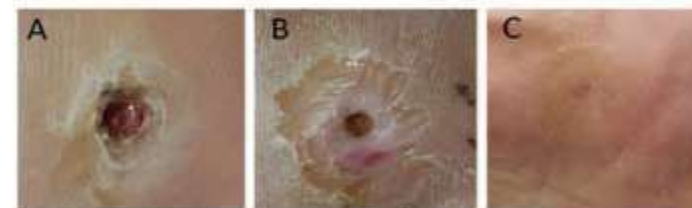

We are here to make your lives easier and more meaningful!

Wound Care

HAM (Human Amniotic Membrane Therapy)

Its Effective Use in the Management of **Chronic or Acute Diabetic Wounds and Venous Leg Ulcers.**

Healing progression is shown for a 42-year-old female patient from before the treatment (A) to complete closure after 4.5 weeks of HAM therapy and a single graft application (C).

A New Day Community Health Center provides comprehensive **Wound Care** Treatment to patients in their Homes, Assisted Living facilities, or long-term care to ensure positive experiences. NV Health Care facilities include **Pressure Ulcers, Arterial and Venous ulcers, Diabetic Wounds, PC, and Surgical Wounds.**
